GEN. McCLELLAN,-The Boston Post, in an ticle on the advance of the Federal troops beand the Potomac, pays a glorious tribute to our young commander, and uses the language of Na-pier in relation to Wellington to sketch his charcter. Wallington was accused of moving on the Fabian system, as McClellan has been, but Napier combate this idea, end among other things shows how indefatigable he was in the detail of preparing his army. "Iron hardihood of body," apier says, "a quick and sure vision, a grasping aind, unliting the power of thought and the habit of laborions minute investigation and arrange-ment; all these qualities he possessed, and with em that most rare faculty of coming to prompt and sure conclusions on sudden emergencies This is the mark of a master spirit in war; withont it a commander may be distinguished, he may be a great men, but he cannot be e greet captein. Where troops nearly alike in knowledge are op posed, the battle generally turns upon the decis

hardly lost an hour in the first duties, the mighty

labor of preparation. For this does he already

And every liberal heart, as this noble worker steps on the perilous edge, must yearn for his triumph; as this will insure the speedy triumph of the couse—a support of the majesty of American Law-that is so largely in his hands. But this cause is not in one man's hand; is not a ne man's cause: but it is the personal concern of millions of freemen who mean that a conspirecy gainst the Government chell be defeated, and that the supreme law of the lend shall stand, anything in the local laws or acts of the States to the contrary notwithstanding. It is not a war of the North on the South, but of patriots on hose who, enywhere, resist the Constitution and the Laws made pursuant to it. The Federals, overpowered by numbers, had at litest accounts fallen back a distance of eight miles, leaving a quantity of heggage in the hands of the enemy, and were retreating towards Pilot Knob. At Pilot Knob considerable alerm existed, and Col. Carlin was making every preparation for the impending struggle at that point. The Wisconsin Regiment, which left St. Louis on Wednesday, arrived sefoly a Tronton the next day. A battery of the First Missouri Light Ar-

The Democrat adds:

This news came to us in a manner which leaves no doubt of its general correctnese. We have had no information of so large a body of Federal troops being thrown out as is stated in this report towards the supposed locality of Jeff. Thompson and his bend, and we think in that respect there may be some exaggeration.

The arrival of the 8th Wi-consin will make the force at the Knob a little over three thousand. They have the advantage of some heavy guns and strong position; but, on the other hend, the troops, it will be remembered, are fresh and not well disciplined. If Major Schofield and his hattery are permitted to pass through without detention, we shall rely greatly upon the assistance which he will be able to render the officer in command, Col. Carlin.

LARGE ARMIES,-It is not generally known says the New York Stuats Zeitung, that there is now concentrated on the shores of the Potomac a larger body of troops then has ever been congregated in modern times, except in the hattle of Leipsic. Neither Gustavus Adolphus, ner Fiederick the Great, nor Washington, Wellington, nor Scott, had ever under his immediate command any thing like the number which is now under the command of General McClollan. Frederick the Great never led into the field more than 80,000 men at a time, but all his great battles were fought and won with hodies of troops ranging be-tween 30,000 and 60,000. Napoleon, at Austerlitz, vanquisbed with 80,000 men the united Russian and Austrian armies, counting about 100,000. At Jena and Auerstadt there were 130,000 men under the command of the Emperor of the French. The bloody battle of Wagram was fought with 150,000 men against the Austrians, and in the equally celebrated battle at Borodino about 120,000 Frachmen were apposed to the Russians. The decisive battle at Waterloo was fought with only 80,000 Frenchmen against Blucher and Wellington. Hut the battle of Leipsic set in motion a gigantic army of about 500,000 men, Napoleon having under his command about 200,000, and the united forces of Russia, Austria, and Prussia about 120,600. It will appear from this comparison that the armies which are confronting each other on the Potomac were exceeded in number only by those vest with the plains of Leipsic de.lded with with a few times neigh, cure the most obstuate with with a few times neigh, cure the most obstuate 00,000 men, Napoleon having under his comarmies which, on the plains of Leipsic, decided will, with a few times using cure the most ob

It is needless for ns to say that these people who have thus been driven from their homes by To Itis Excellency, the Governor of the State of Sir: The present insurrection had not even revealed itself in arms when disloyal citizens hatened to foreign countries to awake their intervention for the overthrow of the Government and the destruction of the Federal Union. These agente are known to have made their appeals to some of the more important States without success. It is not likely, however, that they will remain content with such refusals. Indeed, it is understood that they are industricusly endavoring to accomplish their disloyel purposes by degrees and by indirection. Taking advantage of the emberrassments of agriculture and manufacture and commerce in foreign countries, resulting from the incurrection they have inaugurated at home, they seek to involve our common country in controversies with States, with which every public interest and every interest of mankind require that it shall remain in reletions of poece, amity, and friendship. I am able to state, for your asisfaction, that the prospect for eny such disturbance is now less serious than it has been at eny previous period during the course of the insurrection. It is, nevertheless, necessary now, as it has hitherto been, to take every preceduling that its purto their comforts while here, and to enable them county, where some of them have relatives. The measures which the Executive can adopt in this emergency are such only as Congress bas sanctioned, and for which it has provided.

The President is putting forth the most diligent efforts to execute these measures, and we have the great eatisfaction of seeing thet these efforts, seconded by the faver, aid, and support of a leval, particitic, and self-sacrificing people, are rapidly bringing the military and navel forces of the United States into the highest state of efficiency. But Congress was chiefly absorbed during its recent extra session with these measures and did not provide as amply as could be wished for the fertification of the coa and lake coasts. In previous wars the loyal States have applied themselves by independent and separets activity to the support and aid of the Federal Government in its aducus responsibilities. The same disposition has been manifested in a degree eminently benorable by all the loyal States during the present insurrection. I'hilip Tompert eworn in as luterpreter of the FOR COL.
